The Cardiovascular, Allergy, and Respiratory Summit (CARPS) is a 2.5 day national continuing medical education event for NPs and PAs in Primary Care. The Summit is designed to educate NPs and PAs in the clinical diagnosis and treatment of common allergies and cardiovascular and respiratory diseases. Due to the shortage and dwindling number of primary care physicians, educating advanced practice clinicians on these most prevalent diseases is more essential than ever.

New for 2017, CARPS offers optional pre-conference workshops on EKG and Spirometry.

**Benefits of Exhibiting at CARPS**

- CARPS will provide face-to-face contact with approximately 300 NPs and PAs practicing on the frontlines of primary care, treating patients with cardiovascular and respiratory diseases.

- Conference schedule and layout configured to maximize one-on-one contact between attendees and exhibitors.

- Higher ROI for your marketing dollar—much greater than larger association events yield.

- Exhibitor package includes 6’ draped table, two chairs, carpet and wastebasket.

THE NEED:

**Cardiovascular Disease Prevalence**

Cardiovascular disease (CVD) is the leading cause of death in the United States and is responsible for 17% of national health expenditures. As the population ages, these costs are expected to increase substantially.

(Source: American Heart Association)

**Respiratory Disease Prevalence**

Currently in the United States, more than 23 million people have asthma. Approximately 13.6 million adults have been diagnosed with COPD, and an approximately equal number have not yet been diagnosed. Annual health care expenditures for asthma alone are estimated at $20.7 billion.

(Source: Office of Disease Prevention and Health Promotion)

**Why NPs and PAs**

With the dwindling number of primary care physicians combined with the addition of nearly 32 million patients into the system as a result of the Affordable Care Act, educating primary care NPs and PAs on diagnosing and treating prevalent conditions such as cardiovascular and respiratory disease has never been more critical.

**NPs and PAs:**

See an average of 114 patients per week

Write an average of 145 RXs per week

Write approximately 825 million RXs annually

(Source: Kantar Media, 2013 NP/PA Readership Study, Profiling Data)
